

AKSHAY

Software Engineer | Kochi | [Portfolio](#)

📞 [9741874261](tel:9741874261) ✉ akshayachar03@gmail.com **in** [linkedin.com/in/akshayachar](https://www.linkedin.com/in/akshayachar)  github.com/akshayachar03

Technical Skills

Operating Systems: Linux, Windows Server

Cloud & Languages: Azure, AWS, Bash, Python

CI/CD & Version Control: Jenkins, Git, GitHub, ArgoCD

Configuration Management & Automation: Terraform, Ansible

Containerization & Orchestration: Docker, Kubernetes, Helm

Monitoring & Logging: Prometheus, Grafana, Azure Monitor

Networking, Databases & Security: SSL/TLS, VPN, IIS, MSSQL, DNS Management

Experience

Poornam Infovision Pvt. Ltd

August 2023 – Present

Software Engineer

Kochi

- Provided technical support and system administration for both Linux and Windows servers (IIS, Apache, Nginx), ensuring uptime, security, and performance optimization.
- Installed, configured, and optimized a range of web hosting applications, including WordPress, DNN (DotNetNuke) on IIS, and SSL certificates, ensuring secure, high-performance, and seamless deployments for clients.
- Managed software installations, updates, and troubleshooting for web servers, databases (MSSQL, MySQL), and cloud-based environments.
- Assisted in server monitoring, log analysis, and basic networking tasks, ensuring smooth IT operations.
- Actively exploring DevOps tools like CI/CD pipelines, containerization, and infrastructure automation to improve operational efficiency.

Education

Yenepoya Institute of Technology

2019 – 2023

Bachelor of Engineering | VTU University

Mangalore

Selected Projects

TicketHub – CI/CD with GitHub Actions, AKS, & GitOps

July 2026

- Designed and deployed a cloud-native ticket management application using React, Node.js, Express, MongoDB Atlas, Docker, Azure Kubernetes Service (AKS), and Azure Container Registry (ACR).
- Implemented an end-to-end CI/CD and GitOps workflow using GitHub Actions, Helm, and Argo CD, automating Docker image builds, ACR publishing, and Kubernetes deployments. Configured Prometheus, Grafana, Azure Monitor, and Log Analytics for application and infrastructure monitoring, and resolved real-world Kubernetes deployment and observability issues including CrashLoopBackOff, ServiceMonitor configuration, Prometheus target discovery, and Grafana monitoring.

CI/CD with Azure DevOps for a 3-tier Application

July 2025

- Containerized a Flask-MySQL web app and built CI/CD pipelines in Azure DevOps to push images to ACR. Also, Automated AKS deployments using ArgoCD.
- This project implements CI/CD for a three-tier slot booking application using Azure DevOps, Docker, Azure Container Registry (ACR), and ArgoCD. It automates container image builds, tag-based Kubernetes manifest updates via shell scripts, and GitOps-driven deployments to Azure Kubernetes Service (AKS) using self-hosted agents and path-based triggers, enabling scalable and fully automated application delivery.

Certifications

- Certified in Azure Solutions Architect Expert (AZ305) offered by Microsoft.
- Certified in Azure Administrator Associate (AZ104) offered by Microsoft.
- Certified in Kubernetes for Absolute beginners offered by KodeKloud.
- Certified in DevOps Pre-requisite Course offered by KodeKloud.
