AKSHAY

DevOps / Cloud Engineer

Kochi, India | 9741874261 | akshayachar03@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software Engineer with 3+ years of overall IT experience, currently working in a DevOps role with a focus on Azure cloud infrastructure and Kubernetes. Hands-on experience with Azure, AKS, Docker, Terraform, CI/CD, and GitOps, with a focus on cloud infrastructure and application deployment.

Currently supporting Azure infrastructure, AKS workloads, monitoring, networking, and deployment activities in a client environment. Microsoft Certified: Azure Solutions Architect Expert (AZ-305) and Azure Administrator Associate (AZ-104), with a growing focus on Azure cloud infrastructure, Kubernetes, and DevOps practices.

TECHNICAL SKILLS

Cloud Platforms: Microsoft Azure (AKS, ACR, App Services, Monitor, Key Vault), AWS (EC2, EKS, ECR, S3, EBS)
Kubernetes & Containers: Kubernetes, AKS, Docker, Helm, EKS, Kubernetes Deployments, Services, ConfigMaps, Secrets
Infrastructure as Code: Terraform, ARM
CI/CD & Version Control: Azure DevOps, GitHub Actions, Jenkins, Git, GitHub, ArgoCD (GitOps)
Monitoring & Logging: Azure Monitor, Prometheus, Grafana, Log Analytics
Operating Systems & Web Infrastructure: Linux, Windows Server, IIS, Apache, Nginx
Networking & Security: VNet, Subnets, NSG, DNS, Private Endpoints, Private DNS, RBAC, SSL/TLS, VPN
Databases: MSSQL, MySQL, MongoDB
Automation & Scripting: Bash, Python, PowerShell
AI & AI Tools: OpenAI, LLMs, Prompt Engineering, AI-assisted DevOps, GitHub Copilot

PROFESSIONAL EXPERIENCE

Software Engineer — **Aug 2023 – Present**
Poornam Infovision Pvt. Ltd — *Kochi*

- Supporting the DevOps team with day-to-day Azure infrastructure and cloud platform activities across development, UAT, and production environments.
- Working with Azure resources, AKS, Kubernetes, Azure Monitor, Log Analytics, networking, and cloud infrastructure as part of assigned operational and troubleshooting activities.
- Supporting AKS operations by checking cluster health, nodes, pods, deployments, services, events, and application logs to investigate assigned issues.
- Assisting with troubleshooting of Kubernetes workloads and application deployments by analyzing pod status, events, logs, configurations, and resource utilization.
- Working with Azure networking components such as VNets, subnets, NSGs, private endpoints, and private DNS while supporting assigned infrastructure activities.
- Participating in CloudOps task review calls and daily team discussions to understand infrastructure tasks, issues, changes, and operational requirements.
- Supporting monitoring and troubleshooting activities using Azure Monitor and Log Analytics, with exposure to identifying infrastructure and application-related issues.
- Assisting with deployment and operational activities involving Docker, Kubernetes, Helm, container images, and CI/CD pipelines.
- Prior to the current DevOps assignment, supported Linux and Windows server environments, performing server monitoring, troubleshooting, log analysis, and basic network diagnostics.
- Worked with IIS, Apache, and Nginx, including application hosting, SSL/TLS configuration, server maintenance, and troubleshooting.
- Assisted with installation, configuration, patching, and troubleshooting of servers, databases, and web applications for client environments.

PERSONAL PROJECTS

TicketHub — Kubernetes Deployment, CI/CD & GitOps **July 2026**

Azure Kubernetes Service (AKS) | Docker | Helm | GitHub Actions | Argo CD | Prometheus | Grafana

- Designed and deployed a cloud-native ticket management application using Docker containers and deployed the application to Azure Kubernetes Service (AKS).
- Built and managed Kubernetes deployment workflows using Helm, including application deployment and configuration through Kubernetes manifests and Helm charts.
- Implemented an end-to-end GitOps deployment workflow using GitHub Actions and Argo CD, automating container image builds, ACR publishing, and Kubernetes application deployments.
- Configured application observability using Prometheus, Grafana, Azure Monitor, and Log Analytics to monitor containerized workloads and Kubernetes applications.
- Troubleshot production-like Kubernetes issues including CrashLoopBackOff, ServiceMonitor misconfigurations, and Prometheus target discovery failures.
- Investigated application, container, and Kubernetes logs to identify deployment and runtime issues and restore application availability.
- Automated the application release workflow from source-code commit through container image build and Kubernetes deployment.

CI/CD with Azure DevOps for a 3-Tier Application **July 2025**

Docker | Kubernetes | Terraform | Azure DevOps | ACR | GitOps

- Containerized a Flask–MySQL three-tier application using Docker and established automated build and deployment workflows.
- Built Azure DevOps CI/CD pipelines to automate Docker image builds and publishing to Azure Container Registry (ACR).
- Automated Kubernetes manifest updates using shell scripting and implemented GitOps-driven deployments to AKS.
- Configured self-hosted pipeline agents and path-based triggers to automate application deployment workflows.
- Implemented a complete deployment pipeline from source-code commit to Kubernetes deployment with minimal manual intervention.
- Applied containerization, Kubernetes orchestration, CI/CD, and GitOps practices to create a repeatable application deployment process.

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert (AZ-305)
- Microsoft Certified: Azure Administrator Associate (AZ-104)
- Microsoft Certified: Azure Fundamentals (AZ-900)
- KodeKloud Certified: Kubernetes for Absolute Beginners
- KodeKloud Certified: DevOps Pre-Requisite Course
- KodeKloud Certified: Terraform Basics Training Course
- KodeKloud Certified: Docker Training Course

EDUCATION

Bachelor of Engineering (VTU University) **2019 – 2023**
Yenepoya Institute of Technology *Mangalore*

Pre University College (Karnataka State Board) **2017 – 2019**
Government PU College *Kundapura*
